

LEAKINSIGHT

Advanced analytics platform for dynamic water network data visualization - insight beyond detection

Representing the pinnacle of water network management, this cloud-based software seamlessly integrates with our Ovarro acoustic leak detection loggers, offering unparalleled real-time data, advanced analytics, and a secure interface. LeakInsight leverages state-of-the-art automated analytics, saving valuable time and resources by swiftly identifying and prioritising potential leaks. All this translates to up to 75% increased efficiency—setting a new standard in the industry.

LOGGERS SUPPORTED	Phocus3 and Phocus3M acoustic noise loggers and Enigma3M 3hyQ correlating noise loggers.
PARAMETERS PROCESSED	Leakage detection and leak location.
DEVICE	Desktop, laptop or mobile device.
BROWSER	Google Chrome 67 or higher.
DATA FORMAT	Bespoke encoded.
LOGIN	Unique client log-ins.
CUSTOMISED USER ACCESS LEVELS	Configurable to individual client access requirements. Client and sub-user accounts can be created to make controlled logger data available to individual users.
