LEAKHUB
AN OVARRO TECHNOLOGY

LEAKVISION

Analytics platform for dynamic water network data visualisation.

LeakVision is Ovarro's cloud-based software accompanying acoustic leak detection loggers to locate leaks in the water distribution network, providing insight and visualisation of leak locations. This solution, combined with our acoustic correlation logging products, allows for the processing and display of water network data, event alarms, and correlated leak positions; all on one platform.

LOGGERS SUPPORTED	**Phocus3 and Phocus3M acoustic noise loggers and Enigma3M 3hyQ correlating noise loggers.**
PARAMETERS PROCESSED	**Leakage detection and leak location.**
DEVICE	**Desktop, laptop or mobile device.**
BROWSER	**Google Chrome 67 or higher.**
DATA FORMAT	**Bespoke encoded.**
LOGIN	**Unique client log-ins.**
CUSTOMISED USER ACCESS LEVELS	**Configurable to individual client access requirements. Client and sub-user accounts can be created to make controlled logger data available to individual users.**
